COMPRESSED AIR

Our compressed air systems are designed for 24/7 operations and meet 99% of all industrial applications - Food, Chemical, Engineering and other sectors including the specified requirements of all ISO8573.1:2001 quality classes.

Glaston supplies, installs and services HPC KAESER compressors.

VACUUM PUMPS & BLOWERS

We can design and install vacuum pump and blower systems to suit all industries - Power Stations, Recycling, Automotive, Food, Nuclear Power and Aerospace.

COOLING WATER SYSTEMS

As an independent distributor and service provider for cooling water systems we can supply the 'total solution' that is specific to your application or industry requirements.

NITROGEN GENERATORS

Due to its versatility, nitrogen use is becoming increasingly popular in a number of industries. The key benefit of having a nitrogen generator on-site is cost; up to 40% savings can be made when compared to buying nitrogen cylinders.

For more comprehensive information about any of the products we supply please visit our website.
