

OUR SERVICES

PEOPLE - OUR STRONGEST ASSET

At Glaston, our team of highly qualified, experienced service engineers and in-house staff is committed to delivering total customer satisfaction. We supply the highest quality products in the market place and offer the highest levels of **service** and **technical** expertise. This includes a **World Class** air compressor installation service which excels using best practice techniques.

OUR SERVICES INCLUDE:-

- Design, supply and installation of **energy efficient** compressed air (including high pressure applications, gas and nitrogen generation), vacuum and cooling water systems.
- Bespoke controls for maximum **energy efficiency** and remote monitoring.
- Comprehensive maintenance and **total site management** for maximum reliability.
- In-house funding of new capital equipment.
- AirCharge – the provision of air by the cubic meter – only pay for the air you use.
- AirSave – valuable **energy savings** from generation to the point of use.
- Supply of written schemes of examination to meet the Pressure Systems Safety Regulation.
- Delivery of bespoke energy saving innovative solutions.

Glaston provides **single source responsibility contracts** to many of our clients whereby we manage, operate and maintain the air compressor systems for the entire facility/factory thus offering **total reliability, service and cost benefits**.

For more comprehensive information about any of the products we supply please visit our website.
