

## AIR COMPRESSOR FAQs

Here at Glaston we get a lot of questions on a daily basis about [air compressors](#). So, we've set about answering all your frequently asked questions here in one handy FAQ document.

### WHAT ARE AIR COMPRESSORS USED FOR?

Our air compressors are created for industrial use and can be adapted for a multitude of sectors. These include the food, chemical and engineering industries to name but a few. If you have an industrial use for one of our air compressors in mind, but are unsure if they can be applied correctly, ask us today and we can advise you on the best industrial air compressor, specifically for your application.

### WHAT INDUSTRIAL AIR COMPRESSOR BRANDS ARE AVAILABLE?

When it comes to finding which industrial air compressor brand is right for your application, Glaston has a range of high quality products from some of the best manufacturers in the business. We've been suppliers of [HPC Compressors](#) (the UK arm of German air compressor giants, [KAESER](#)) for decades. We can also supply a limited range of used Atlas Copco air compressors, as part of our varied portfolio of industrial air compressors.

### WHAT IS THE BEST INDUSTRIAL AIR COMPRESSOR?

That depends entirely on your application and budgetary requirements. As official HPC distributors, we have been supplying their air compressor products for decades. We recommend their products highly because we believe that they offer unparalleled energy savings, cost-efficiency and versatility. Their extensive range of rotary screw compressor is a popular product on our website. Whilst the initial outlay may be higher with a HPC compressor, the overall cost-benefits that they offer in terms of efficiency and reliability, we think makes them the superior choice.

Our HPC air compressors are designed and manufactured by KAESER, known for its innovative products and intelligent management systems, including their rotary screw compressors. A popular KAESER product that we distribute is the Sigma Air Manager (SAM). This management system controls and reports on multiple air compressors at the same time.

### WHY CHOOSE GLASTON AIR COMPRESSORS?

Choosing a Glaston air compressor ensures you are given in-depth advice and technical expertise from a team with many years of experience. Our extensive product range, and unrivalled reputation as an authorised UK distributor of HPC Compressors, makes us the right choice to design, install and maintain your air compressor.
